Training Program on Web3 and Dapp Development

The Training Program in Web3 and Dapp Development s a comprehensive program designed to provide the fundamentals of Web3 technology, blockchain, and decentralised application (Dapp) development. The training is ideal for those curious about blockchain, cryptocurrencies, and the decentralized web, and eager to gain practical skills in Dapp development.

Familiarity with web technologies such as HTML, CSS, and JavaScript would be beneficial for the participants. It is also helpful to have a general understanding of blockchain technology, though it will be briefly covered in the early stages of the training.

The Participants are expected to bring their own Laptops with the following specifications and ensure internet connectivity throughout the Program.

Requirements	Recommended
Processor	Intel i3 (8th Gen) or above
RAM	8GB
Hard disk	HDD/SSD
OS	Windows 10/11/Ubuntu 20/22
Architecture	x64
